

Maximise Uptime, Minimise Risk with Offshore System Administrators

Optimise and secure your IT infrastructure with dedicated offshore system administration

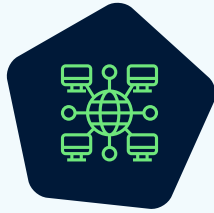

System administrators are crucial for keeping your IT infrastructure secure, reliable, and efficient. Their role includes monitoring systems, conducting security and troubleshooting practices, implementing updates, and ensuring data backup and recovery. Without them, businesses risk costly downtime, security breaches, and data loss. Outsourcing these roles ensures proactive, expert management that minimises disruptions and safeguards your operations.

Benefits of Hiring Staff Domain's Offshore System Administrator

Server Management

Ensure servers are correctly configured, updated, and secured. This includes managing software, hardware, and firmware updates and troubleshooting server-related issues.

Network Management

Cost-effective solution for managing network infrastructure by leveraging specialised expertise, advanced tools, 24/7 monitoring and support, without the overhead costs of an in-house team.

Database Management

Manage the setup and configuration of databases, and implement robust security measures to prevent unauthorized access and maintain the accuracy and reliability of data.

Cloud Infrastructure Management

Manage and optimise your cloud services, such as AWS, Microsoft Azure, or Google Cloud, to enhance performance and cost-efficiency.

Staff Domain's Smart Offshore Outsourcing

Hardware, support, and training programs on the client business; whatever our workforce needs, we do our best to provide.

Bespoke business growth plan

Our research-backed bespoke business growth plan ensures your business's success in offshoring.

Open regular communication

We offer clear guidance on finding and integrating the best talent into your team.

Why Clients Trust Staff Domain

Australian IT provider enlists Staff Domain to manage surge in support requests

"Staff Domain delivered an offshore tech support team at a time when we really struggled to do it locally. They provided invaluable support to help get our new recruits up and running quickly, including the facilitation of processes and training. We always saw the value, but we didn't truly appreciate just how valuable Staff Domain was until COVID-19 hit. Processes shifted swiftly and smoothly, and their training of our offshore team shone through in the way they effortlessly handled our clients. We cannot thank Staff Domain and our offshore Interlinked team enough."

Carlos Da Conceicao
Director of Sales, Interlinked

Leading Australian ice manufacturer offshores for faster hiring and improved retention

"Staff Domain don't mess around. They were quick and thorough with the recruitment process and presented us with candidates who had impressive work experience, strong problem-solving skills, and excellent communication. We found the right staff within only 4 weeks!"

Stephen Bull
National Technology Officer, Bells Pure Ice
